

# The Hong Kong Polytechnic University

## Subject Description Form

<b>Subject Code</b>	LGT1041
<b>Subject Title</b>	Introduction to Artificial Intelligence and Data Analytics in Business
<b>Credit Value</b>	2
<b>Level</b>	1
<b>Pre-requisite/ Co-requisite/ Exclusion</b>	Nil
<b>Objectives</b>	The objective of this subject is to provide students with an overview of artificial intelligence and data analytics (AIDA) and their latest business applications. This subject seeks to help students develop data thinking and analytical skills for transforming data into insights for better decision making. In addition to theoretical knowledge of AIDA, students can gain hands-on experience with Python programming. Knowledge and skills acquired through this subject can be extended to other subjects related to AIDA and Python programming.
<b>Intended Learning Outcomes</b> <i>(Note 1)</i>	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Demonstrate an understanding of the foundational concepts of Artificial Intelligence and Data Analytics (AIDA).</li> <li>b. Acquire basic skills in using AIDA technologies and applications.</li> <li>c. Articulate examples of how the adoption AIDA could enhance business discipline.</li> <li>d. Demonstrate an awareness of global contemporary ethical issues and impact from AIDA applications in daily life.</li> <li>e. Acquire fundamental Python programming skills.</li> </ol>
<b>Subject Synopsis/ Indicative Syllabus</b> <i>(Note 2)</i>	<p><b>Artificial Intelligence (AI)</b> Basic concepts of AI. A brief history of AI. AI and machine learning, robotics, and natural processing language. AI applications in marketing, banking, e-commerce, education and other industries. Future of AI. Ethical issues of AI.</p> <p><b>Big Data, Cloud Computing and Data Analytics Tools</b> Overview of big data, cloud computing and data analytics tools for structured and unstructured data. Business applications of data analytics tools.</p> <p><b>Python Programming</b> Fundamental programming concepts. Variables, expressions, statements, and arithmetic operations. Conditional statements (if, then, else). Iterations (while loop and for loop). Strings and lists.</p>

<p><b>Teaching/Learning Methodology</b> (Note 3)</p>	<p>The course will implement a variety of methods as its pedagogy to help students achieve the above learning outcomes.</p> <ul style="list-style-type: none"> <li>• An online module is provided to cover materials related to AIDA (a 3-hour online module developed by Department of Computing).</li> <li>• The course is delivered in the format of 2-hour per week, including lecture and tutorial.</li> <li>• Lectures are designed to illustrate key concepts and application cases relevant to Python and AIDA in business contexts. Guest lectures might be arranged.</li> <li>• Tutorials provide a student-centered environment to facilitate interactive learning. There are two types of tutorials. <ul style="list-style-type: none"> <li>○ Exercises, cases, and projects are provided for students to practice, discuss, and apply AIDA knowledge to solve business problems both individually and collaboratively.</li> <li>○ Hand-on sessions are provided for students to gain practical experience with Python programming.</li> </ul> </li> </ul>																																																						
<p><b>Assessment Methods in Alignment with Intended Learning Outcomes</b> (Note 4)</p>	<table border="1" data-bbox="536 790 1390 1400"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th> <th rowspan="2">% weighting</th> <th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th> </tr> <tr> <th>a</th> <th>b</th> <th>c</th> <th>d</th> <th>e</th> <th></th> </tr> </thead> <tbody> <tr> <td>1. <b>Student Study Effort Expected</b>	Class contact:	
	▪ Online module	4 Hrs.
	▪ Lectures and tutorials	22 Hrs.
	Other student study effort:	
	▪ Preparation for lectures and tutorials	20 Hrs.
	▪ Preparation of assignment / group assignment and presentation / examination	36 Hrs.
	Total student study effort	82 Hrs.

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
